EST online advice; support for local and city-region advice, delivery and research programmes

Wales

With British Gas, deliver the outreach, advice and engagement for the national NEST programme

Arbed area based programme (delivered with Carbon Trust)

Northern Ireland

Administer NISEP supplier obligation programme

Smart Meter Advice Project

- Online tool provides households with smart meters with more accurate information on energy saving potential: including savings from EE improvements, as well as behavioural changes.
- Pilot: 89% of households reported an increased understanding of energy use, 89% reported feeling more positive about smart meter systems, 78% of respondents used the web tool at least once a month
- **System will be rolled out as part of Home Energy Scotland advice**, so advisors can access callers' smart meter data and the tool: enables non-digitally enabled households to benefit from their smart meter data.

Welcome to SMAP

The Smart Metering Advice Portal (SMAP) is a webtool developed by Energy Saving Trust offering a user-friendly web tool displaying household's energy use over time.

SMAP also offers each household tailored information about how to reduce their energy use through the installation of various measures.

What is SMAP?

Smart meters are the next generation of utility meters and will be rolled out under the UK smart meter roll-out programme to every home in England, Wales and Scotland from July 2019 and to all homes in Northern Ireland by 2020.

Energy Saving Trust, the Northern Periphery and Islands Programme, the Scottish Government, and the Welsh Government are providing advice on smart meters.

Homes of some vulnerable households provided with in-home advice through Home Energy Scotland

Priorities for governments and strategic direction on fuel poverty across the UK

Northern Ireland

- A government (and a Fuel Poverty Strategy)

England

- Plans for delivery against announced targets; a trajectory for the rented sector; financing for owner-occupier homes; local authority support; advice.

Wales

- A new Fuel Poverty Strategy including regulatory trajectory; local authority support; enhanced advice.

Scotland

- Process improvements and action on barriers/blockers to fulfil delivery ambitions; eg EPC process improvements, action to overcome decision making barriers in flats

Thank you for listening
